Please leave us a testimonial and include your name.

- I was pleasantly surprised by the energy and engagement levels at our AEG event. Great facilitation. - Caitlin Rogger
- "I really enjoyed the participation and listening to the views from regional stakeholders on advancing better mobility and clean transportation in the capital district. Mode shift from cars to transit is crucial, but better policies (i.e. congestion charging) and more reliable public transportation will be key drivers for success. Transit agencies will benefit not only from more riders, but more funding and support from tax payers!" - Mike Butler, Program Lead - Zero Emissions Vehicles, WSP.

Any suggestions?

- I for one would have benefited from just a touch more information up front about what I was getting into. Maybe people should attend these at least once before being a featured speaker? But it ended up well so this isn't a complaint, just a suggestion.
- Additional time on the breakout session would have been better

Post Event Survey (5/5)
