## Please leave us a testimonial and include your name.

- The AEG Q2 discussions around Buildings and Construction are always my favorite. The only way New York can achieve it's carbon reduction goals is to encourage building owners to deploy deep energy efficiency retrofits. Aaron Miller
- AEG continues to foster interactive discussions designed for follow up action through commitment /collaboration. Targeting Energy, Environment and Climate variables via a wide range of Quarterly Topics - yet with a surgical precision, working towards practical solutions that are Regional - but may have Universal application. I find the AEG Platform to be of significant value to both my personal & professional development. Proud to contribute to this platform!

## Any suggestions?

- Great job as always. I look forward to meeting in person again soon.
- More time in the break out room would be helpful. Thank you!
