

23Q2 NET ZERO BUILDINGS TASK FORCE SUMMARY

12-MONTH CRITICAL DERIVED OBSTACLE

Successful building decarbonization requires understanding the idiosyncrasies of associated assets. This requires measurement, funding/incentives, utility partnerships and stakeholder engagement/alignment.

JOSEPH SZABO
SVP Head Property
Management

12-MONTH SOLUTION

**Asset mapping, publicly available,
standardized language**

M1: Create list of distributed energy resources, easily accessible, usable right now!

M2: Stakeholder engagement, commentary and feedback

M3: Refine approach as needed.

23Q2 TASK FORCE UPDATES

UPDATES:

Scheduled roundtable discussion with engineering building management, to understand building typologies, and NYSERDA, to discuss funding opportunities

NEXT STEPS:

- Host roundtable
- Build building characteristics/DER use case matrix
- Create RFP mini-bid
