

**Climate Resilience Execution
Agency for Dominica**

Dominica Resilience Scorecard Case Study

**Francine Baron
Chief Executive Officer
April 2022**

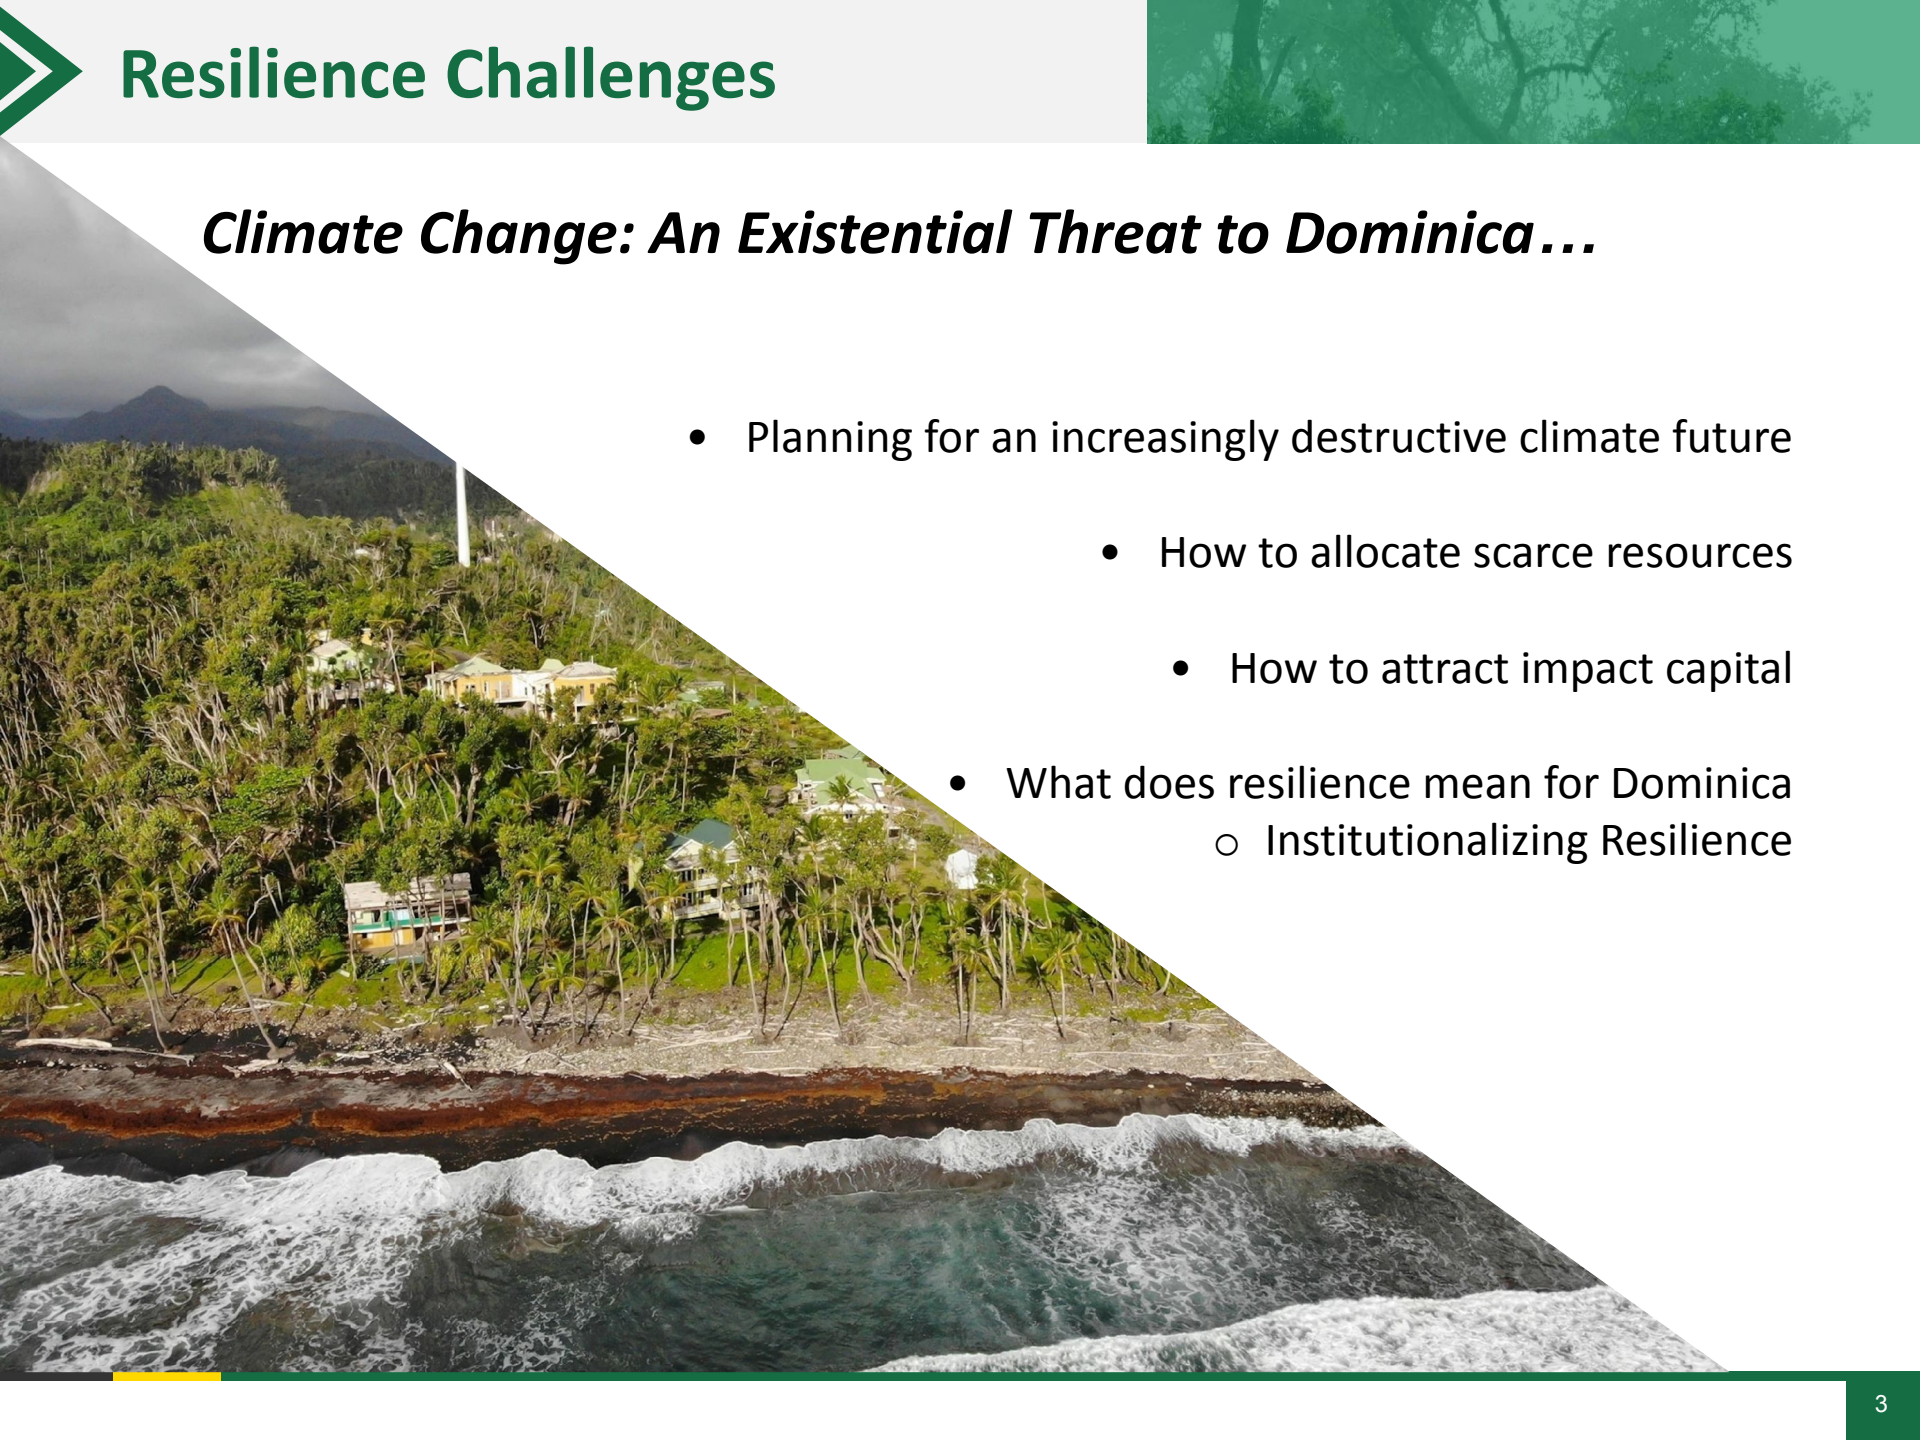

Harsh Reality

- US 1.3 billion in losses/226% loss of GDP
- 90% of homes damaged and many destroyed
- 100% loss of power
- Roads impassable
- Communities cut off

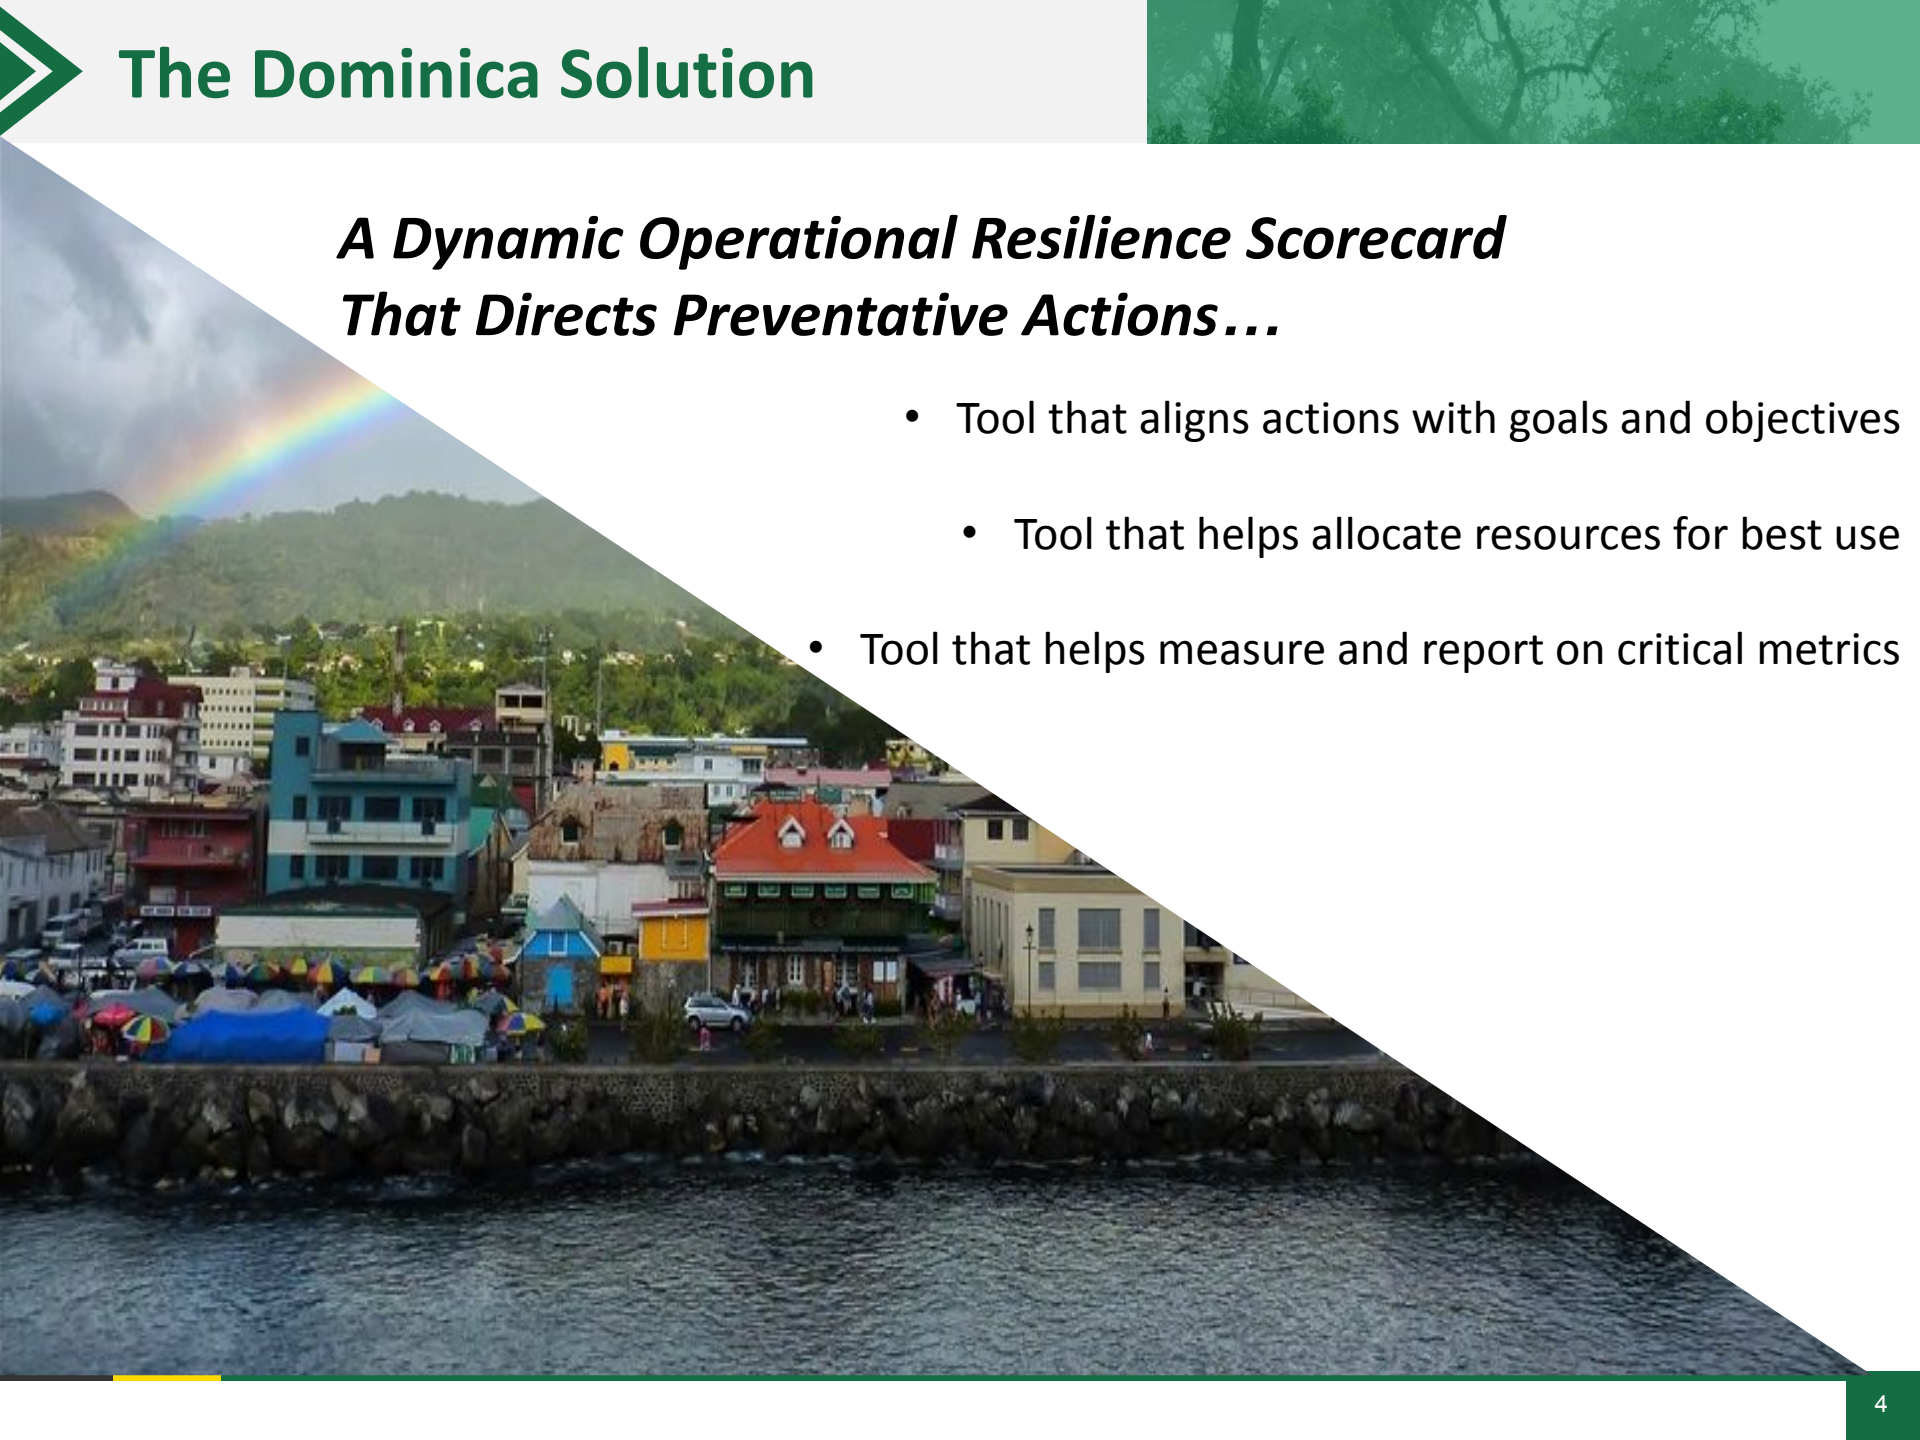

Climate Change: An Existential Threat to Dominica...

- Planning for an increasingly destructive climate future
 - How to allocate scarce resources
 - How to attract impact capital
- What does resilience mean for Dominica
 - Institutionalizing Resilience

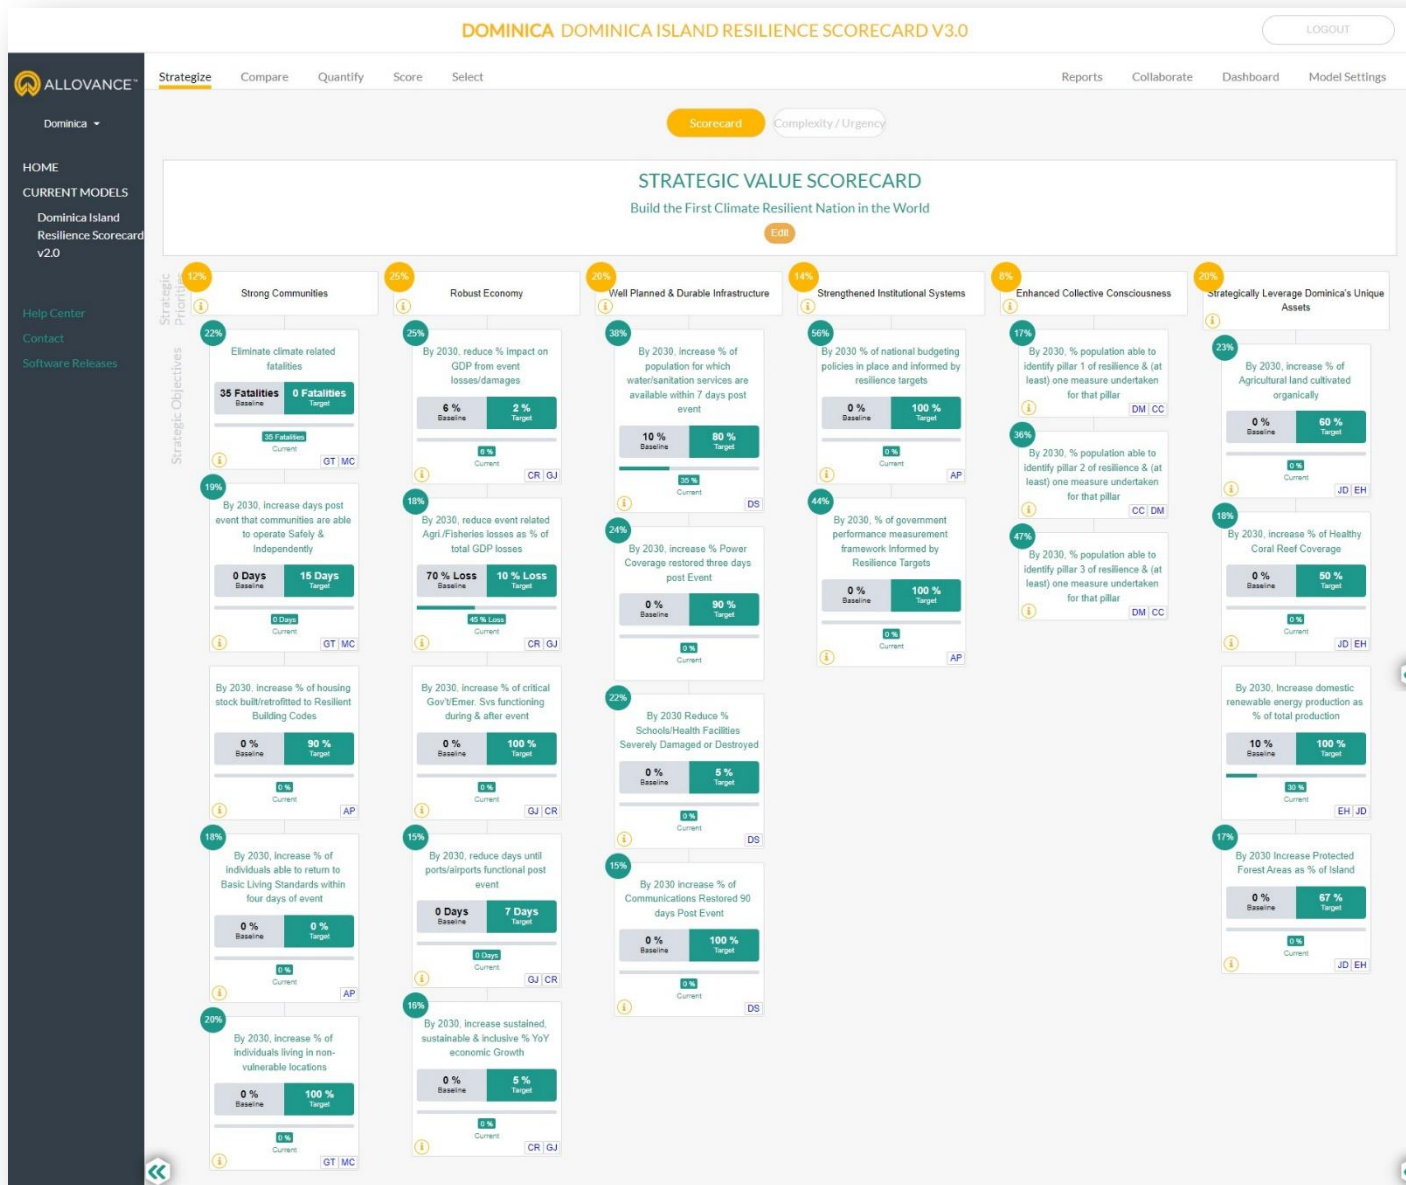

A Dynamic Operational Resilience Scorecard That Directs Preventative Actions...

- Tool that aligns actions with goals and objectives
- Tool that helps allocate resources for best use
- Tool that helps measure and report on critical metrics

Score Card

Building the Right Team & Plan Within Resource Constraints...

- Securing & Coordinating Right Team
- Data/Metric collection
- Availability
- Integrity
- Cost/Continuity
- Metric Selection & Reporting

Buy-in Across the Ecosystem is Critical...

- Top-down support
- Necessity of internal evangelist/sponsor
- Shared national vision

Project Implementation and Expansion...

- Fully operationalize Scorecard with existing and future projects
- Use Scorecard to catalyze engagement between Dominica and private capital
- Share knowledge with region

THANK YOU...
