month timeframe - provide quarterly updates on progress.

- MODERATOR
- Follow up with updates/any progress reports from other entities to keep the issue at fore-front.
- Follow up in-person workshops/meetings. This should be an on-going discussion and not just left in writing/policy or as action plan with 'empty' promises.

- Relationships, maintain relationships from table.
- Solution based dialogue with diverse stakeholders
- Network including use of technology
- Continue the conversation, quarterly.
- Concrete commitment of resources by both public and private orgs.
- Make sure all interested participants of IRAC can join

### IRAC End Survey (4/4) What is your greatest takeaway from IRAC 2019

(1/3)

- Look forward to output next year
- Financing is a big issue
- Resilience is everybody's usiness
- Consistancy of the obstatcles to the resiliency
- Everyone has such an important part. It's for us now to combine resources to make the world resilient and green
- Common problems even though each country is unique

- One planet, one race, one goal.
- The convergence of the main problem being providing of affordable financing being common across all the groups at lowest cost to consumers.
  Also convergence of customer empowerment themes as a solution for resilience.
- Resiliency doesn't mean bullet proofing!
- Thinking differently about raising finance

### IRAC End Survey (4/4) What is your greatest takeaway from IRAC 2019 (2/3)

- Resiliency although focussed here is on climate change, the concept is about bouncing back or recovering from life's challenges. We all need to develop resiliency in our households.
- The challenges are broad and can be overwhelming. A clear plan and focus on near term goals is important to maintain progress
- Achieving resiliency in a

clear policy environment.

- Resiliency is contingent, for many, on funding.
- The greatest obstacle to development is the lack of/limited access to financial resources for resiliency projects
- People are looking for a way forward and open to good ideas
- Collaboration works! But funding for the

winner would gurantee better outcomes over the 12 month period. The Region needs impact not more meetings for meetings sake.

- People are eager to solve this issue
- Contacts and apportunities.
- Need more accessible financing solutions
- It is complicated.
- Synergy among participants
- It's time to create

actionable results, we all understand and agree on the challenge

- Realistically planning for achieving island resiliency whole keeping tariffs down
- need for outside box thinking
- There are some great ideas out they're, we just need to make them happen!
- There is consensus on the issue of funding.
- Issue of financing
