Creating a Community Clean Power Agreement

AEG Roundtable Objective

- Convene industry experts to inform project scope development for a ~ 180 kW solar installation on the roof of the Sunset Park Family Health Center at NYU Langone Brooklyn to ultimately become an RFP.
- Invited speakers will lay out suggested key considerations regarding the implementation of CCPA that addresses key factors such as feasibility, funding, solving for inequitable health and financial burdens, timing and cost.
- Speakers have 8 minutes and 5 slides to present key considerations, information, challenges and/or opportunities that should be addressed when developing this community benefit oriented solar project / CCPA.
