

THE KEY ISSUES CONFRONTING OUR MUNICIPALITIES

- Moving from passive Off-Taker to active participant
- Renewed ministerial statement aligned with the national Energy Public Policy
- Cultural change
- Minimize disconnect between identified energy vulnerabilities and Nationally available solutions

A hand holding a magnifying glass over a dirt road with a car in the distance, symbolizing focus and vision.

Municipalities must renew their ministerial statement, activate themselves as a key participant of the island's energy resilience goals and endeavor to make their constituents stakeholders in Puerto Rico's energy future.

The Municipalities Advantage towards Energy Resilience and Equity

- Direct and existing means of community engagement
- Firsthand knowledge of system vulnerabilities and inequity
- Administrators and operators of an extensive day to day local services platform

The Municipalities Advantage towards Energy Resilience and Equity

- Direct access to central government, public corporations and Grid Operators
- Access to funding
- Natural liaison between constituents and national initiatives

The background image shows the Casa Alcaldía, a grand, light-colored building with a central clock tower and three flags flying on tall poles. The text is overlaid on the left side of the image.

FIRST STEPS TOWARDS THE SOLUTION

Raising Awareness...

- Raise awareness within municipal administrations of their vital role in identifying and addressing areas of vulnerability and energy inequity.
- Raise awareness as to municipal governments can transform their constituents' energy vulnerabilities to energy resilience and equity.
- Raise awareness of the resources available to assist the municipalities in acquiring critical knowledge to inform their Energy Department.
