

AEG Washington Stakeholder Challenge

William Ellis
Director, Governmental and External Affairs
Mobility and Transportation

Powering Communities

Pepco is a critical partner to Maryland and the District in ensuring equitable investments and outcomes in the communities we serve.

Through our investments to make the grid smarter, stronger and cleaner, we ensure all customers will benefit from the city's decarbonization efforts.

Enabling Solutions to Climate Change

We provide clean energy solutions and technologies to combat climate change, reduce local air pollution, and power a healthy, sustainable future

Enhanced Grid Performance

We are modernizing our energy infrastructure, making it stronger, safer and more secure

Improve Social Equity and Maintain Affordability

We help power the economic health and well-being of the diverse communities we serve, and advocate for equity

Delivering a World Class Customer Experience

We empower customers with affordable services and by helping them take charge of their energy needs

Accelerating the Clean Energy Transformation while Prioritizing Equity and Affordability

Smarter

Giving Visibility of Pepco's Distribution Circuits to allow EV Installers to quickly understand where grid availability is located to

Stronger

As more and more customers and critical facilities power their Fleets through the use of Electrification, Pepco is hardening our system

Cleaner

Enabling greater clean energy choices through Electric Vehicle Programs that includes Time of Use Rates and Rebates that incentivize customers to

These vignettes illustrate:

- The types of capabilities and investments we need to develop to transform and decarbonize our energy system
- Powering the local economy through job creation, strategic investment and workforce

Increase access to the education and training required for careers in the Transportation industry enabling the creation of minority diverse businesses

Target and Prioritize investments to ensure equitable outcomes in the communities we serve

Partner To Do More

Innovate to accelerate benefits and provide opportunities to local communities

Ensure our most vulnerable customers are not left behind in this carbon free transformation

Challenge Statement:

Regarding Transportation and Mobility, to achieve the regions Clean Transportation goals, the most critical obstacle to overcome is **prioritizing equity and affordability** in our efforts to accelerate our path towards electrifying our transportation sector.
