- Excellent use of my time, one of the best online events I have attended since the pandemic. It was educational, inspirational, and had direction. It effectively used the time and expertise of everyone in the room to move the conversation forward. All around fantastic- thank you for the effort and investment that went into producing this.
 - It is amazing to be brought together with creative and forward thinking minds.
- These sessions and this work have been such a highlight.
Francesca Spinelli
- It was such a great opportunity to discuss positive actions and changes to impact our community towards a clean energy future.
 - Envisioning reality from the private and public sector - great discussion from both perspectives. Eduardo Guerra
 - AEG presents a quarterly reset of the most pressing energy

issues facing a given region, while implore SMEs spanning energy industry in a collaborative fashion to cite/identify a host of pressing challenges. Upon reaching consensus on the prioritization - AEG goes deeper, challenging said SMEs to work together in tabling practical solutions spanning a 12 month duration with quarterly milestones. These quarterly events bring the best minds forward - from which ideas spawn and networks are

established and/or extended. It has been my honor to contribute to these meetings across Boston, New York and Washington D.C. They have fostered deeper thinking and equally a stronger commitment towards our shared resolution. I thank H.G. and the

AEG Team for their tireless efforts moderating and guiding us along these impactful/informative exchanges - that ultimately lead to execution! Stephen J. Almeida Jr. Aris Energy Solutions Director of Fuel Cells /Clean Heat & Power FCHEA - Board Member

- I thought mark chambers comments were incredible insightful and I loved hearing him go more

into depth on the intersection with equity and energy/climate. Mahesh and Charlottes problems were both great candidates, and ultimately I think both would be hard to make meaningful progress on in a year, but hopefully that's what the stakeholder sroundtable will be for.

- I think this session hit the nail on the head!!!.....excellent information shared about the clean

energy future, diversity and equality issues, sustainability issues, etc.....this needs to be an on-going conversation that continually engages key stakeholders to work together in solving the challenges of the City, State, nation and the world.....
Gerald Dawes, Director Business Ethics and Compliance, Con Edison

- This was an encouraging and spirited discussion of pressing issues by serious practitioners.

Any suggestions?

- Can't think of anything now. The trivia effort was s great idea and speakers were fantastic.
- I do think having individuals from the city would be helpful here. The strategy that we landed on is very much founded in harnessing the mayor's office and the LL97 working groups to engage on the issue.
- I think a combination of that last two teams standing would be an awesome concept to work on.
- THE BANKS - TARGETING

THEM FOR MEMBERSHIP AS THE TRANSITION TOWARDS GREENER SOLUTIONS WILL REQUIRE EXPANDED CAPITAL/LIQUIDITY. Likewise The Utilities should be targeted for membership as Stewards of the Grid

- This should not be a one and done.....keep the conversation going.....
